

GEOSYNTHETIC TECHNOLOGY LIMITED
PRESTIGE LAKES PORTFOLIO

Nofa Farm Project, Saudi Arabia

Part of a 200,000m² (50 acre) complex of reservoirs and lakes to irrigate a horse racing course, an 18-hole golf course, and a safari park. Literally a desert paradise.

Tag McLaren Sports Racing Cars, Woking, England

A formal large lake envelops the building like a moat. It is linked to balancing lakes, reed beds and an 80 metre long cascade.

Olympic Games Athens - Opening Ceremony Lake

There can be no finer example of a complex lining project where leakage was unthinkable. More than 5 billion people worldwide watched this ceremony!

Bluewater Retail Park - Europe's largest, Kent, England

The conversion of deep quarry pits into lakes totalling 140,000m² utilised complex lining techniques at vertical quarry faces.

Millennium Dome, London, England

Ecology lakes with undulating basal profile. More than one kilometre of watertight mechanical fixing was required to seal liner penetrations at boardwalk foundations.

When quality, reliability and expertise in geomembrane engineering are of PARAMOUNT importance, ONE company is PRE-EMINENT.
Geosynthetic Technology Limited is justifiably proud to have carried out some of the world's most demanding lake lining projects.
